

ASX/Media Announcement

25th August 2009

Purchase Agreement for Epithermal Gold Prospect – Stanley’s Hope, North Queensland

China Yunnan Copper Australia Limited (**ASX: CYU**) today announced it has entered into a purchase agreement with the owner of Mining Lease 1631 in the Pentland District of northern Queensland. Stanley’s Hope consists a number of undrilled structures of epithermal gold affinity, potentially similar in style to Pajingo and other epithermal gold deposits.

Results from reconnaissance surface sampling from **twenty samples averaged 2.8 g/t gold on epithermal gold structures (Figures 1 and 2)**. The Mining Lease is in the Pentland District where CYU’s Toomba prospect returned high grade intercepts at the beginning of this year.

Upon completion of a 30 day due diligence period CYU will be the 100% owner of the property for a consideration of \$40,000 and 1% Net Smelter Royalty payable to the previous owner on commencement of profitable gold production from any potential future operation. The agreement is subject to regulatory approval and renewal of the mining lease. Due diligence will involve a confirmatory survey of the existing mining lease boundaries and completion of transfer documentation to the satisfaction of the Department of Employment, Economic Development and Innovation (DEEDI) of the Queensland Government.

CYU consider the targets and fertile structures identified from field inspections to be a high priority for exploration. CYU’s Chief Geologist is currently mapping the lease and collating previously collected exploration data. It is the intention of CYU to prioritise the drill investigation of the gold mineralised structures during the current quarter.

This initiative is the result of a period of investigation by CYU staff since the listing of CYU in late 2007 and is the first in a series of joint ventures and project acquisitions of superior quality, to be announced.

About CYU

CYU is an Australian company formed to explore for and develop minerals in Australia and overseas. Cornerstone investor, Yunnan Copper Industry (Group) Co Ltd, is one of China's largest copper producers. CYU is targeting high quality copper, gold and uranium projects with eleven wholly owned Exploration Permit for Minerals (EPM's) in the Mt Isa Inlier, Ravenswood-Pentland Province and the Clermont Inlier in Queensland.
